Title: Controller

Size: A4	Date: 2026-04-06	Rev: 2.0
KiCad E.D.A. 9.0.8		Id: 1/20

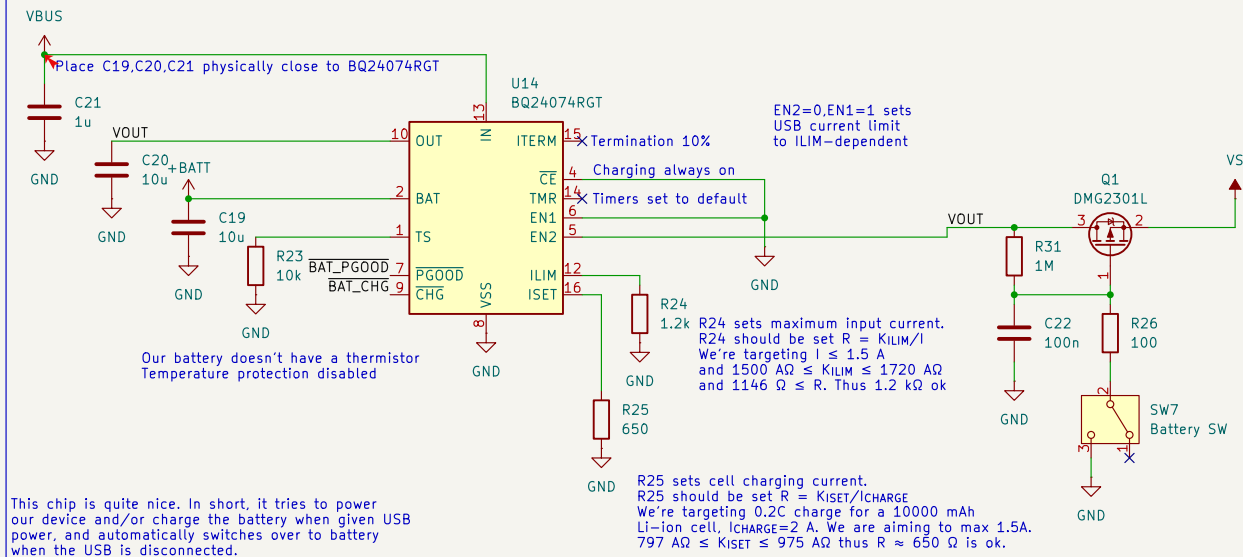

JST-PH Battery Terminal w/ ESD. Overcurrent Protection

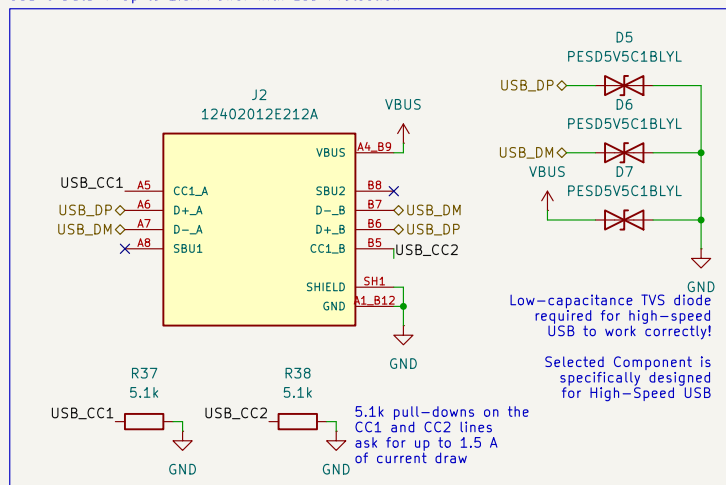

Indicator LEDs

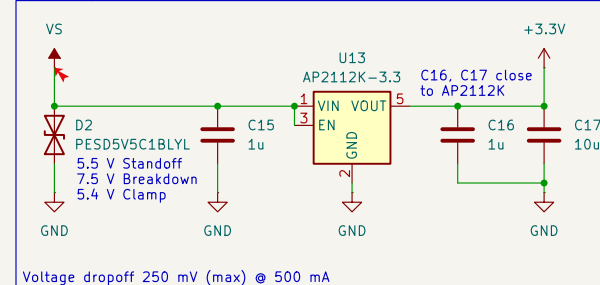

Integrated Li-ion battery charger and power path management

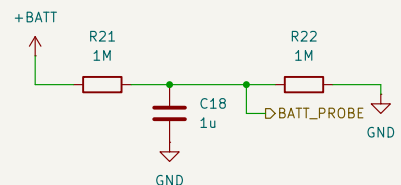

USB C Data + Up to 1.5A Power with ESD Protection

Linear Regulator with overcurrent protection

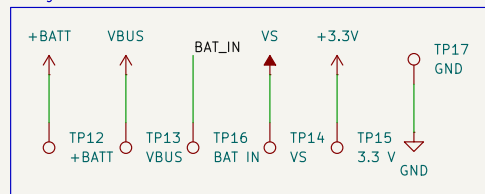

Battery Probe

This is intended to give the MCU a rough idea of how much battery we have remaining.

1S Li-Po batteries go up to 4.2 V when full. Thus a 1/2 voltage divider is more than sufficient to safely measure it with a 0-3.3V ADC

Debug
